

Brio 35 Aquarium

Introducing the Brio 35, the first member of a new family of home aquariums that brings the science of aquaponics to your living environments in a truly elegant design.

The Brio boasts an impressive list of features that makes for a unique experience of both having fresh water fish and growing herbs and plants. It has a lighting system providing highly specific colour spectrums creating photosynthetic reactions, perfect for growing plants, herbs and flowers.

Suitable for: Plants, Coldwater, Tropical, Shrimp

43368

Features & Benefits:

- **Grow greens while purifying water**

Inspired from natural eco systems, the “growing green biological filtration system” allows garden plants to feed on waste coming from the aquatic species, providing a healthy aquatic environment prone to exceptional vegetation growth.

- **Peace of mind**

The automatic timer control allows optimal lighting time exposure specific for each aquatic and garden needs.

- **Optimize plant growth**

The specific colour spectrum LED lights optimize photosynthetic reactions perfect for growing plants, herbs and flowers.

- **Oxygenate naturally**

While providing a decorative ambiance, the integrated waterfall naturally oxygenates and provides optimal circulation.

Available in lustrous black and white

Notes, Hints and Tips

- Cabinets suitable for the Brio 35, is the ROC 450 (#46170AH, #46170BK).
- Filter sponge – The filter sponge should be washed only with water from the aquarium. Never rinse it in tap water or use any chemicals or detergents.
- Impeller – The impeller in the pump should last for years with good care. Ensure the pump is cleaned regularly. When the impeller is worn and needs replacement, it may become noisy and the flow rate of the pump will be reduced.
- The LED bulbs included with the aquarium should last for years. If one should fail, ensure that the correct bulb is purchased.

Warnings & Disclaimers:

- Cabinets is not included.
