Aqua Lube

10400

9 325136 154511 >

The Aqua One Aqua Lube maximises the life of o-rings and moving parts within aquarium equipment.

The Aqua Lube helps lubricate o-rings and impeller shafts to help them last longer, and to prevent them from becoming stuck or dry.

Suitable for: All aquarium equipment with o-rings and impellers

Features & Benefits:

- **Helps minimise stress on fittings when connecting and disconnecting**
- **Prevents o-rings from becoming dry or stuck**
- **Protects o-rings from wear and tear**
- **Can be used on ball valves, taps and other moving parts**
- **A little bit goes a long way**
- **Makes future maintenances easier with less risk of damage to parts**
- **Easy to use**

Product list

Code	Description	Inner Carton	Outer Carton
10400	Aqua Lube Silicone Lubricant 5g	50	200

Note, Hints & Tips:

- Water, chemicals and salt can damage o-rings over time.
- It is recommended to apply a small amount of Aqua Lube to o-rings and impellers during filter maintenance. This will make future maintenances easier with less risk of damage to parts.

Warnings and Disclaimers:

- Not for human consumption
- Wash hands after use
- Avoid eye contact
