### Notes, Hints & Tips:

- For full set up instructions, please refer to the instruction booklet included.
- Remember, all fish will grow. When selecting fish, make judgements based on the maximum size the fish will grow, not simply based on the size of the fish at the store.
- It is recommended that for freshwater aquariums, the filter is run for at least 5-7 days before fish are added. This allows the filter to cycle and establish a population of beneficial bacteria, which break down waste in the aquarium water.

### Warning and Disclaimers:

- It is important to follow the safety guidelines as set out in the instruction manual contained within the packaging of this product.
- This product is not intended for use by children or infirm persons without supervision.
- Do not use the appliance for reasons other than the intended use.
- The use of attachments that are not recommended or sold by the manufacturer may cause the product to be unsafe and should be avoided.
